downers, a colloquial term for depressants, are drugs that decrease mental or physical activity

yeah right,,,,,i had the nasty gremlin removed all 3inches of it yuk gone ye haw,dont give up girls ,speak

with the drugs but i know that i need them.and please something else:is it true that effexor xr is a sedative

before i start that regime to assist containtreat my metastases in the liver, have you experienced any side
effects, particularly in regards to increased stomach acid reflux
